

Information for parents Autumn Term 2021

Here is a summary of the work that will be introduced during the Autumn Term:

Mathematics - Year 3 and 4

Number - Understand and solve problems within the four rules, using mental arithmetic and written strategies. Order and round numbers and understand place value. Introduce simple fractions, including halves and quarters. Compare simple fractions. Solve everyday problems to do with money.

Shape and Measures - Work on the analogue clock to the nearest five minutes. Recognise and categorise 2D and 3D shapes. Recognise the perimeter and the lines of symmetry of 2D shapes. Understand the relationship between m, cm and mm.

Data handling - Collect, introduce and interpret data.

Science - Ourselves

Plan, develop and carry out experiments that give opportunities for individual and independent work, predicting results and sharing ideas and suggestions. There will also be opportunities for recording results in a variety of different ways. During the term, the pupils will have the opportunity to study the following: the skeleton, the main organs of the body, healthy eating and teeth.

Religious Education

Creation Story. Looking after our World.
Feeding the five thousand - discuss famine.
Celebrating Diwali and Christmas.

Theme

Our theme for this term is:

Our world and its people

Here are a few of the children's ideas:

Study the book Guto Nyth Brân—who was he?

Create a sculpture;

Study the work of Aneurin Jones and Pablo Picasso;

Look at food and drink sourced locally, from Wales and from around the world.

Fair trade;

Create an animation;

Look at the diet of an athlete.
